

RoHS

Statement on: Restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS directive)

We are pleased to declare as follows:

1. We permanently observe the applicable legal substance restrictions under the RoHS Directive to assist you in complying with the applicable substance restrictions. Please note that our company does not fall within the directive's scope. Only finished products (electrical and electronic equipment) must comply with the requirements (preparation of an EU Declaration of Conformity, affixing a CE marking). Furthermore, you may rest assured that we pay much attention to German, European, and international developments concerning ethical, social, and environmental standards.

2. For the supply of raw materials, qualified and trustworthy sources or distributors are very important for us. We have known our suppliers for years, and they are familiar with our quality requirements.

According to the information available, we currently assume that the material of the products supplied by us does not exceed the following maximum concentration values (by weight in homogeneous materials): Lead (0,1 %), Mercury (0,1 %), Cadmium (0,01 %), Hexavalent chromium (0,1 %), Polybrominated biphenyls (PBB) (0,1 %), Polybrominated diphenyl ethers (PBDE) (0,1 %), Bis(2-Ethylhexyl) phthalate (DEHP) (0,1 %), Benzyl butyl phthalate (BBP) (0,1 %), Dibutyl phthalate (DBP) (0,1 %), Diisobutyl phthalate (DIBP) (0,1 %).

Once we have further information, we will inform you immediately. We would also like to inform you that possibly occurring traces of the given substances in the materials of the products we supplied are purely coincidental. They were not added intentionally. It is often an unavoidable background contamination, an undesirable side effect due to the high recycling rates of metals.

3. Paragraphs 1 and 2 also apply to the relevant regulations in EU member states, transposing RoHS Directive into national law.

This statement applies only to the product supplied by us. Modifications of the product or material within the processing are thereby not covered.
